    b. Housed separately: Yes / No

16. **Domestic pets**: a. Present / Absent b. safe / Unsafe

17. **Nuisance vectors**: Present / absent

REMARKS:

III General Physical Examination

- Level of consciousness and orientation:
- Built and nutritional status
- Temperature
- Pulse
- Blood pressure
- Pallor
- Icterus
- Cyanosis
- Clubbing
- Oedema
- JVP
- Lymphadenopathy
- Skin

IV Systemic Examination:

A. Respiratory system:

B. Cardiovascular system:

C. Per Abdomen:

D. **Central Nervous system**:

V **A. Remarks and Clinical Diagnosis**

B. Lab Investigations:

c. Final Diagnosis

VI

- KAP (Knowledge, attitude and Practice) of the patient about the disease

- Social and Environmental factors responsible for the disease

VII Management

A. Individual level:

C. Family Level:

C. Community Level:

Child Nutritional Assessment Schedule

Anthropometry:

Weight:……..kgs Height:…….cms

Mid-upper-arm circumference:……cms Head circumference:…….cms

Chest circumference:……..cms Skin fold thickness:……..cms

Clinical Assessment for nutrition assessment:

- Skin : normal/dry and scaly/follicular hyperkeratosis/petechiae/pellagrous dermatosis/
- Hair : Normal/lac of luster / disc pigmented / thin & sparse / easily pluckable / flag sign
- Face :diffulse depigmentation / naso labial dyssebacea / moon face
- Eyes : Bitot's spots / pale conjunctiva / cornea
