ORTHOPAEDICS CASE PRESENTATION
NON UNION

Mentor : Prof Sharath, BMCRI
Presentation by : Priya Ashok Menon, 9th Term, Ramaiah Medical College.

PATIENT PARTICULARS

- Age : 74yrs
- Sex : Female
- Residence : Yeshwantpur Bangalore
- DOA : 13.10.2021
- DOE: 15.10.2021

CHIEF COMPLAINTS

- Inability to walk since 6 months
- Discharge from surgical wound on left leg since 4 weeks

HISTORY OF PRESENTING ILLNESS

- Patient was apparently alright 6 months ago, when she had a fall at night while walking out from the bathroom. She had skid and fallen, heard a sound after the fall and noticed that her left leg had been deviated. She complained of pain and could not get up. She had to be lifted and was taken to the hospital. There was no external injury or bleeding.
- She underwent surgery for the same.
- She continued to experience pain, and was on bed rest. She could not walk, and would only get out of the bed with support for going to the bathroom.
- 2 months later, she complained of discharge from the surgical wound and sustained a fall, after which she was told that her X ray showed the screws and plates had loosened and previous surgery had failed and therefore was operated again.

- Following the second surgery, she continued to be on bed rest. She does not move the left leg, complaining of pain and swelling.
- She has been on regular dressing since the surgery.
- She is a known case of Diabetes since 20 years and has been on medication.
- No history of fever with the onset of discharge
- No history of deformity
- No history of loss of sensation
- No history of any home remedies to the site of fracture.
- No History of previous fractures in the past

PAST HISTORY

- K/c/o Diabetes. No history of other comorbidities.
- H/o past admissions to hospital with uncontrolled blood sugars.
